

VLIV COLIVING PLATFORM

Engagement Overview

Ezeiatech tech team designed and built the entire tech stack of VLIV platform. Product had B2C Android and IOS native apps for booking and payments, B2B Flutter app for property management, Web admin panel for property management and integrations with Zoho CRM, Zoho Books and Zoho Inventory systems.

About the Customer

Experion is a 100% FDI funded real estate developer backed by Experion Holdings Pte. Ltd., Singapore, the real estate investing arm of the \$2.5 billion AT Holdings group of companies.

Business Challenge

As the education and job sectors are growing massively, the number of millennials entering metropolitan towns has been growing as well. The existing Paying Guest option is not the ideal one because of the lack of flexibility and unavailability of exhaustive facilities. The high expected growth in the number of millennials proves this open market to be capitalized with the inclusion of technology to provide safe, hygienic and convenient accommodations.

Ezeiatech stepped up to formulate an entire ecosystem to help co-living providers to initiate growth and maximize profits. Being the first player in the market, we have developed an all-in-one application with Experion Developers to ease the business operations.

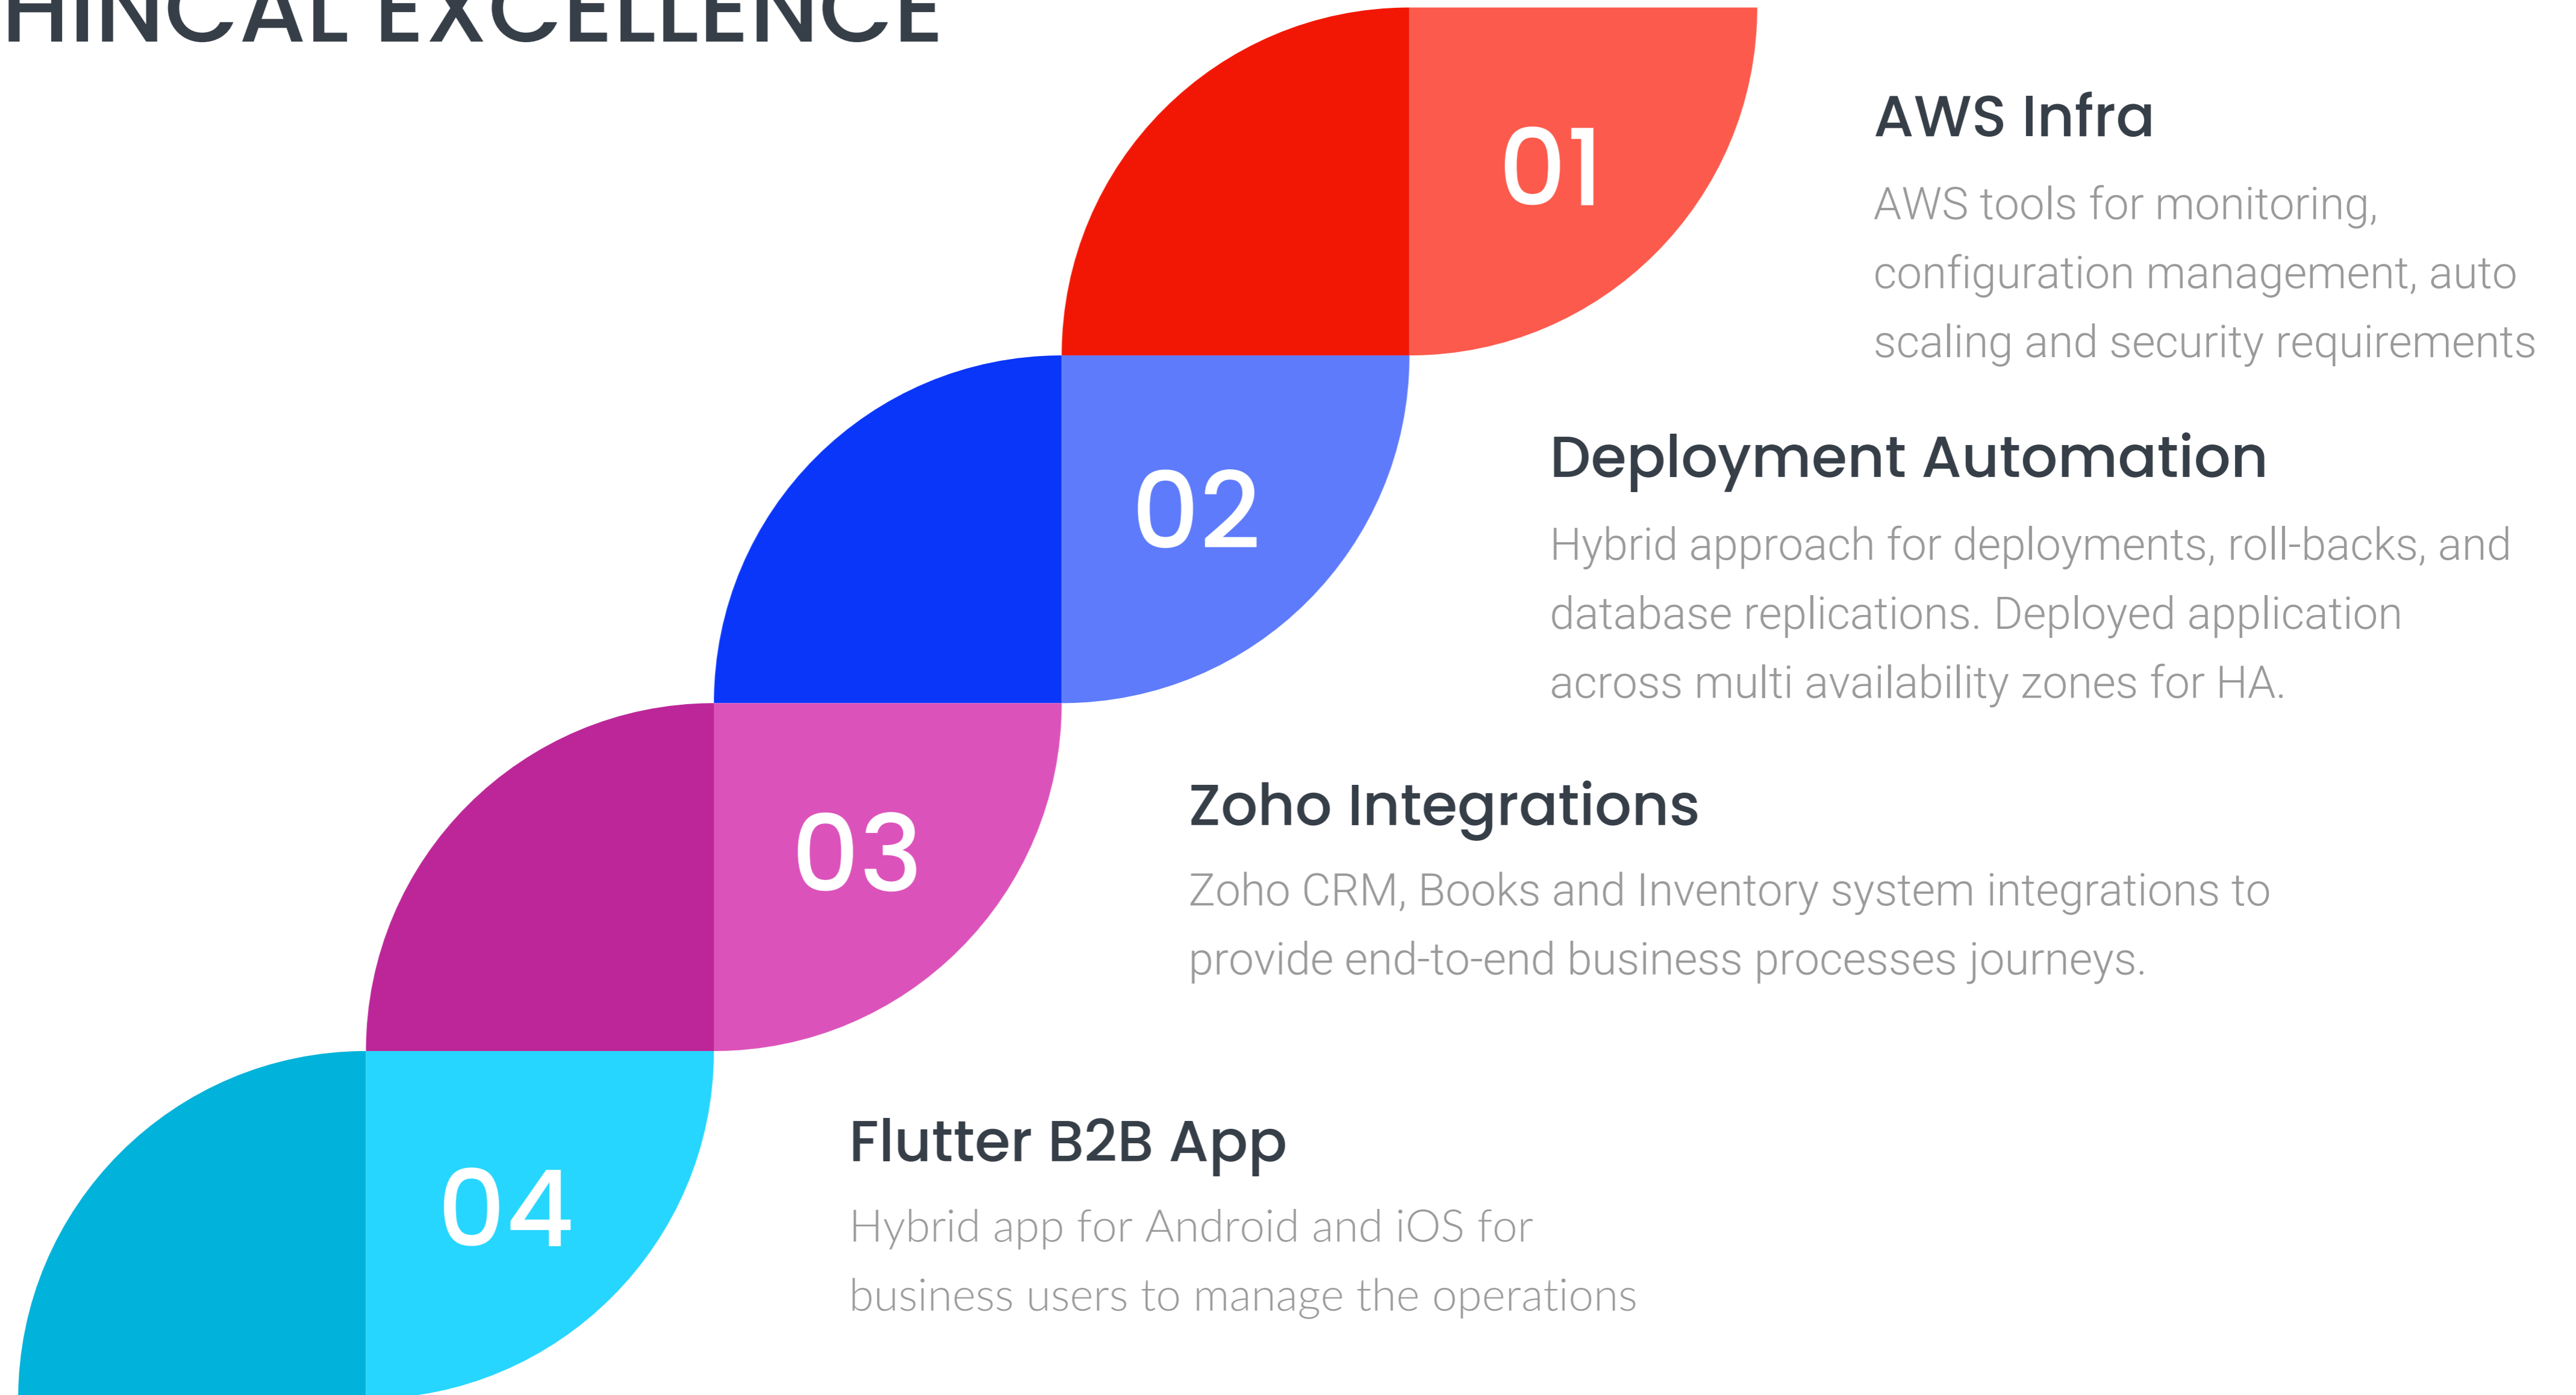

Business Solution

As millennials often face a lot of problems in opting for the best suited co-living property for themselves because of the lack of amenities and facilities provided. Moreover, it becomes a hassle for property owners to keep a tab of their customers to provide them with the necessary requirements. Thus, this offline platform required the intervention for automation which paved the way for VLIV co-living platform.

Overall plan for implementing a highly robust and configurable app for students and parents.

- ✓ Providing a platform for searching high quality living areas around a location
- ✓ Finding rental places nearby educational institutions
- ✓ Aligning wide-ranging specific facilities as per requirements
- ✓ Advanced booking, pre-defined stay periods and list of amenities
- ✓ Quick redressal system for lodging complaints and requests
- ✓ The ability to manage and customize all processes from check in to check out

TECHINICAL EXCELLENCE

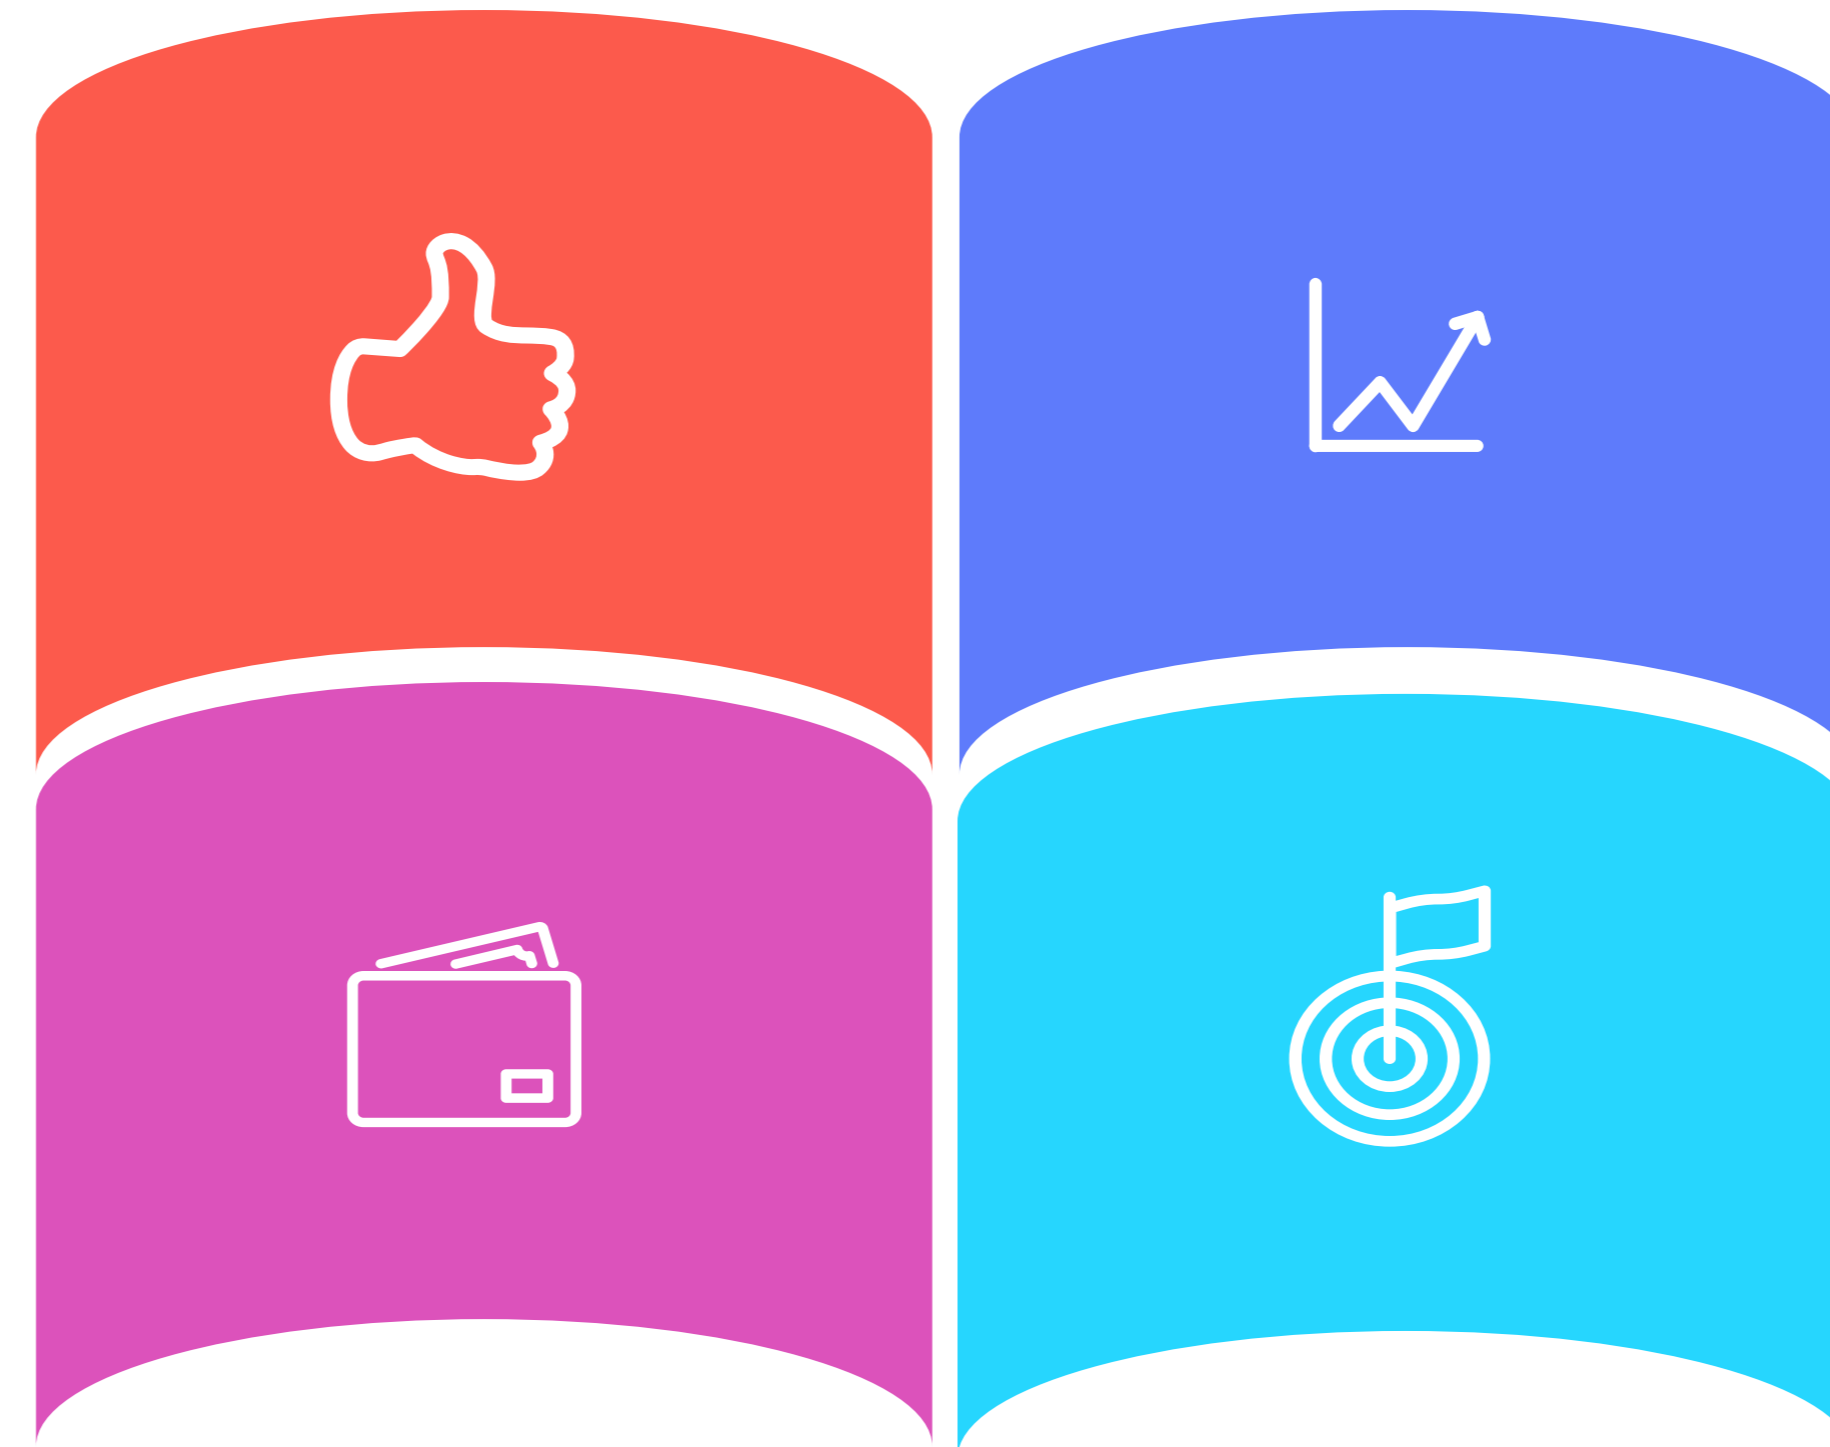

BUSINESS OUTCOME

Customer Experience

Providing the dream experience to students and parents by fulfilling all needs and demands

Cost Efficiency

The application provides automated GST bills and reduces extra work staff required

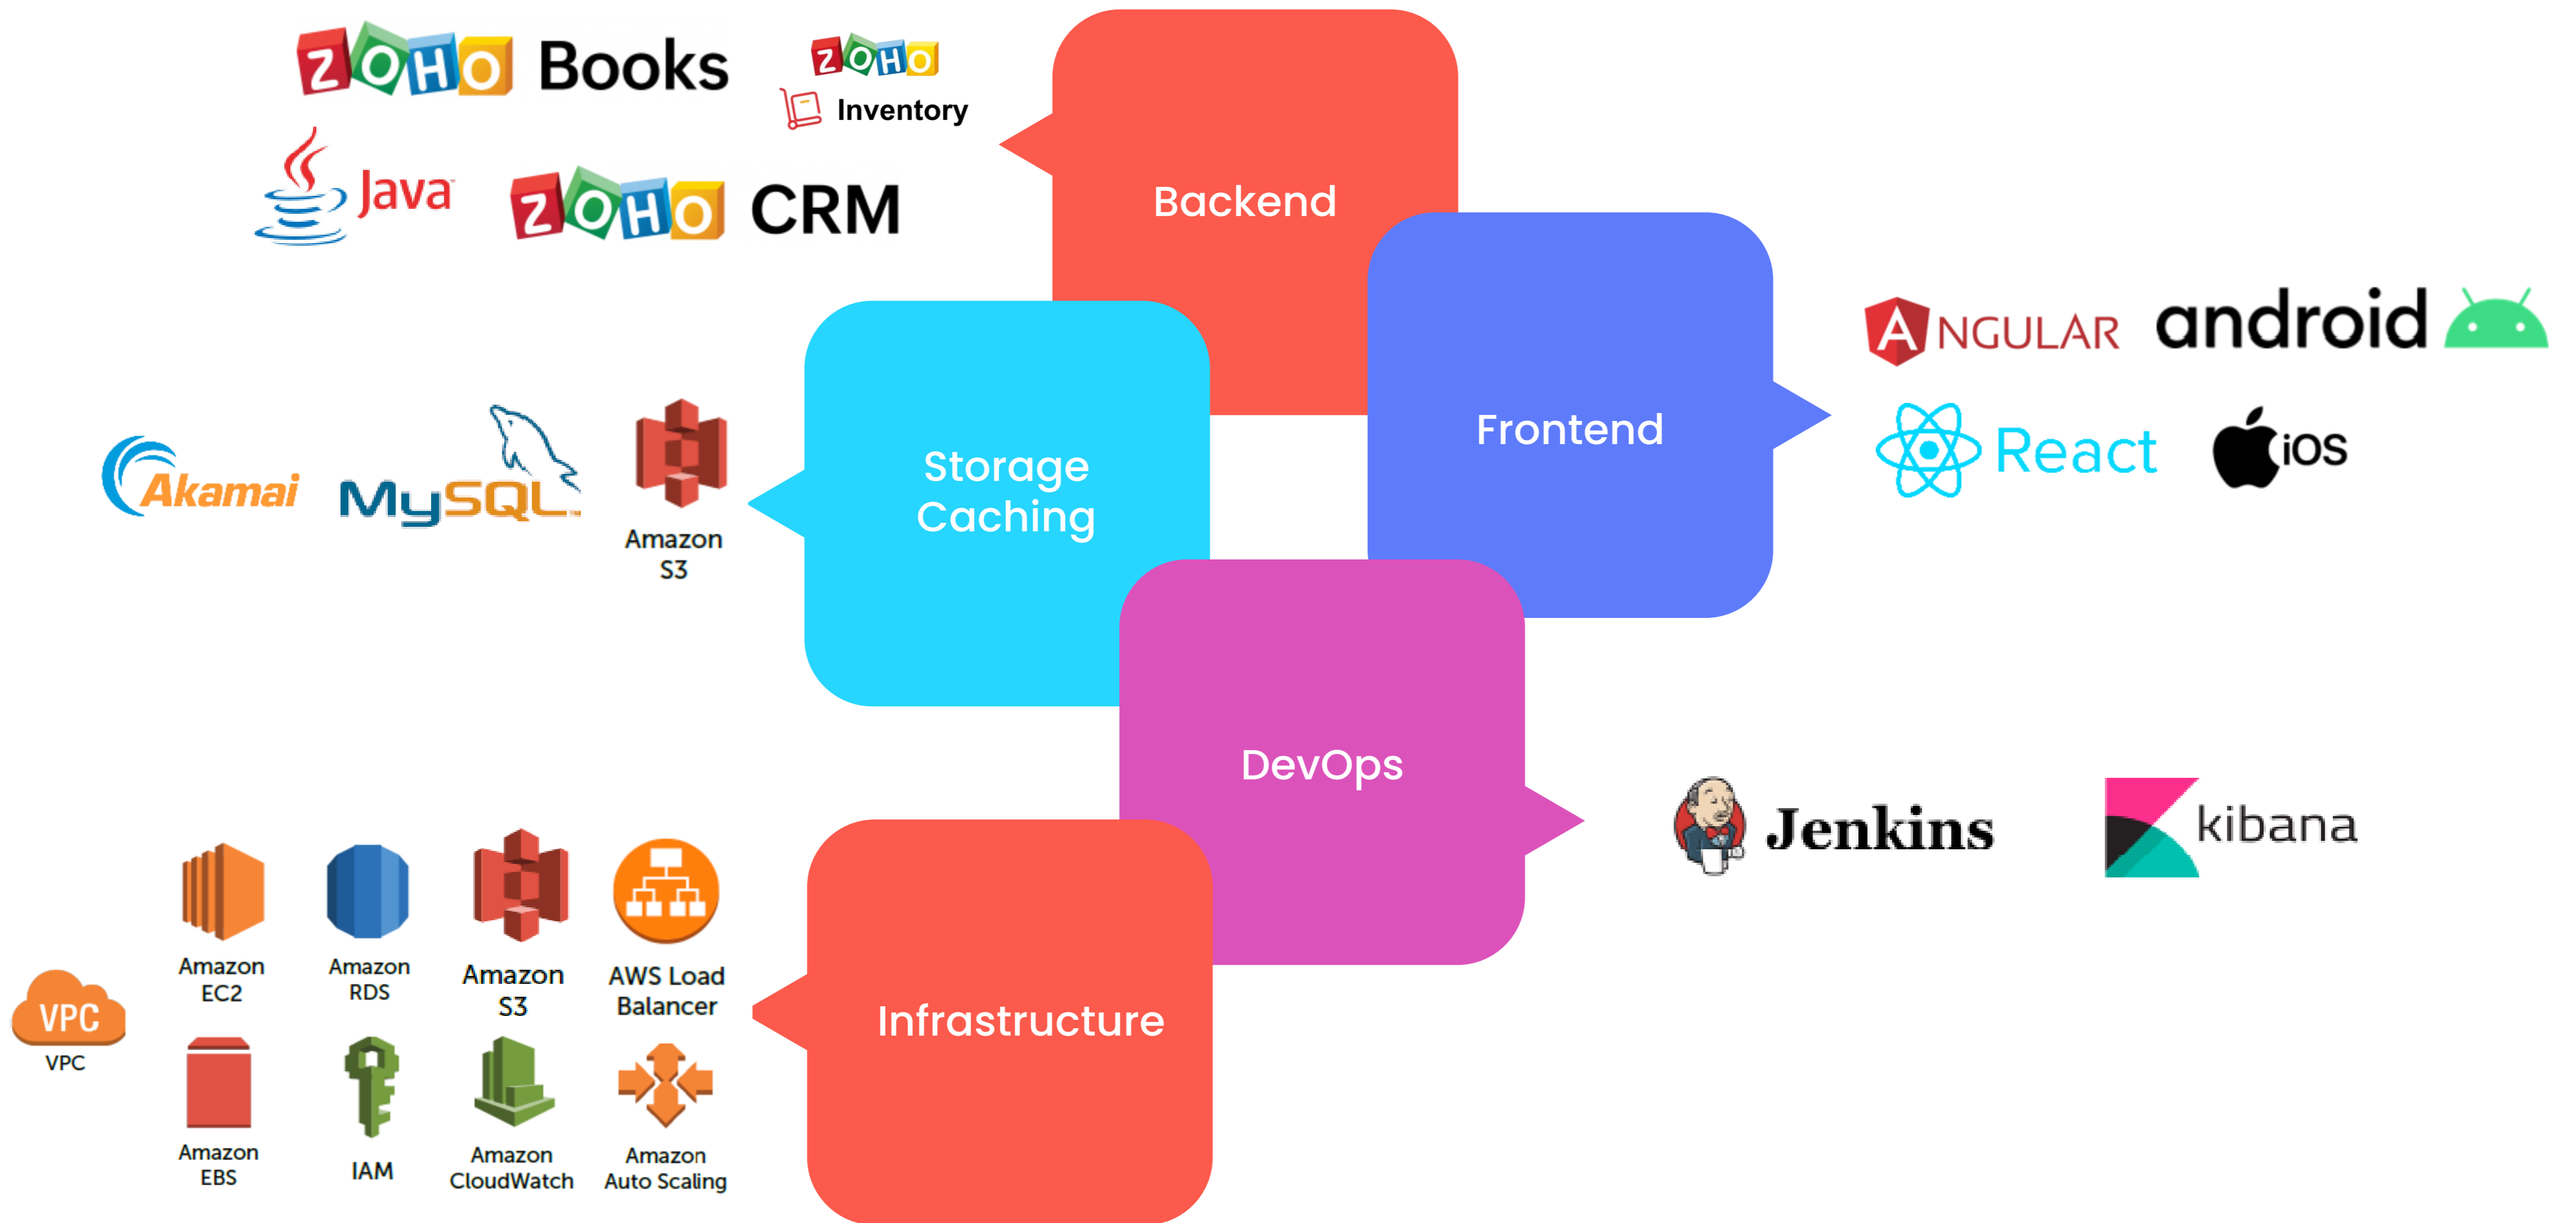

Revenue

Regulating and monitoring end-to-end activities for maximizing profits and revenues

Be First

Coliving platform enabled Experion Developers to be first mover in the space with end-to-end digital system for both customers and employees

TECH STACK
